EDUCATION

Jamia Hamdard University

Bachelor of Technology in Computer Science and Engineering (AI/ML)

New Delhi, India

Aug. 2023 – Aug 2027

EXPERIENCE

Intern, Scientific Analysis Group (SAG), DRDO

Jun 2026 – Jul 2026

Metcalfe House, Delhi

On-site

- Built a blockchain secured drone swarm management system on **Hyperledger Fabric** using Go chaincode and a Node.js SDK layer to issue and validate swarm commands
- Configured permissioned network policies so every command and telemetry record is committed to a **tamper evident** shared ledger and integrated MQTT telemetry from simulated drone nodes

Martian Developer

July 2025 – May 2026

BNB Chain

Global, Hybrid

- Joined the BNB Chain Martians Program as an official community and ecosystem developer
- Built and deployed developer tools and applications on the BNB Chain to enhance the ecosystem
- Authored technical developer blogs on the BNB Chain Forum to educate and onboard new developers

Cybersecurity Intern

June 2025 – July 2025

Haryana Police

Cyber Crime Police Station, On-site

- Worked under the mentorship of Dr. Rakshit Tandon and ACP Priyanshu Dewan on investigation projects
- Developed and enhanced a cryptocurrency wallet tracking tool capable of extracting ownership patterns and transactional intelligence from blockchain wallet addresses for law enforcements
- Researched and implemented blockchain security to identify vulnerabilities and prevent illicit crypto transactions

Lead Web Developer

Sept. 2024 – Nov 2025

Google Developer Group JHU

Jamia Hamdard, On-site

- Organized and conducted 10+ in-person and virtual events, including workshops, hackathons, and tech sessions to engage 500+ participants
- Actively fostered the campus tech community by encouraging students to explore web dev and modern technologies

PROJECTS

Book of Secrets | React, TypeScript, ethers.js v6, Solidity, Hardhat

Nov 2025 – Citrea Hackathon

- Won \$80 – 1st Position at the Citrea Hackathon**
- Built a decentralized application on the **Citrea Testnet** enabling users to write encrypted secrets stored permanently on-chain and monetize them via **cBTC** payment gates
- Implemented **AES-256 encryption** for on-chain secret storage, with password-hash and payment-gate unlock mechanisms so only authorized users can access content

QuestCraft: Minecraft Plugin | Java, Solidity, Node, Express, EJS Templating

May 2025 – BNBChain-Fluxor

- Won \$80 Runner-Up Bounty at the BNB Chain Hackathon at IIT Delhi and Tier 4 Global Prize Winner** at BNB Chain Hackathon with an eligible bounty of \$3000
- Developed a Minecraft server plugin enabling players to complete quests and earn crypto rewards stored in their wallets. Integrated **Solidity smart contracts** on the BNB Testnet for minting SBT's as proof of achievement

AniVerse Marketplace | Node, Express, EJS, MongoDB, Solidity, IPFS

June 2025 – Monad Blitz

- Won 15th position in the Monad Blitz Hackathon and Finalist at the Stellar Ideathon** in Gurugram
- Developed an anime NFT marketplace on the Monad Testnet enabling minting and trading of unique **NFTs**

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, Rust

Frameworks & Technologies: React, Node.js, Express.js, FastAPI, EJS Templating, Vite

Databases: MongoDB, MySQL, SupaBase

Blockchain: Solidity, Smart Contract Development, Hardhat, Remix IDE, encryption

Machine Learning: Python, NumPy, Pandas, Scikit-learn, TensorFlow, Keras
